- Jolly Journal is a news-viewing site. Our team just found an API we liked and made a database to host everything, including signup/account information! I was quite proud of that! We mainly used HTML, MongoDB, Apollo Server, and NEWSAPI.

Muse Master | **Repo:** <https://github.com/ethandanielsmall/MuseMaster> | **Live:**

- Muse Master is an app where you can generate quotes and save them to a favorites section. It was built in a way that allows for more types of quotes to be added at a later date. The app generates and saves quotations from different APIs. It uses just HTML, CSS, and Javascript.
