Education

Arizona State University

Grad Aug 2023

Certificate, Full Stack Web Development

Complete viewing of Robert Martin's Clean Code: Fundamentals

Work Experience

Subway

Feb 2021 - May 2022

Sandwich Artist - Part-Time

- Proficient in handling **customer complaints** and **resolving conflicts** with a focus on maintaining customer satisfaction and loyalty.
- Lots of **multitasking** and **organizing**. Making multiple sandwiches and ringing people up while staying **hygienic** was a big part of the job.
- Here, I mastered customer service and tackled **fast-paced, efficient** workloads.
- I was never late to a shift.

Pet Paradise

June 2022 - Oct 2022

Dog Bather - Part-Time

- Adept at **actively listening** to customer needs, identifying opportunities for **upselling** or cross-selling, and providing tailored solutions to meet their requirements.
- **Compassionate** and patient start. Began learning to bathe dogs at a rate of about 5-7 in a work day.
- **Independently** improved to bathing 7-14 a day.
- Another week and I **exceptionally adapted** into other jobs. I fed, played with, and cleaned kennels of dogs in addition to bathing.
- I was never late to a shift.

The Enclave at Anthem Senior Living

Feb 2023 - Present

Housekeeper / Janitor - Part-Time

- A **diligent, detail-oriented** janitor for a month and a half, then moved to housekeeping overnight.
- **Rapidly adapted** and **excelled** until I missed my old post and a new housekeeper took my place.
- Had only 2 complaints in my month and a half as a housekeeper and often finished work early.
- **Strong communication skills**, both verbal and written, enabling **effective interaction** with customers to address inquiries, resolve issues, and provide product/service information.
- I was never late to a shift.

Projects

Muse Master | **Repo:** <https://github.com/ethandanielsmall/MuseMaster> | **Deployed App:** <https://ethandanielsmall.github.io/MuseMaster/> | **CSS Specialist and Javascript Assistant**

- The app generates and saves quotations from different APIs
- This app has a special place in my heart as the first project I completed with others. I felt, and feel, extremely proud of this little website that could.
- Tools/Languages: HTML, CSS, JavaScript, Bootstrap

Jolly Journal | **Repo:** <https://github.com/ethandanielsmall/jolly-journal> | **Deployed:** <https://fast-brook-59696-a40083fa7f53.herokuapp.com/> | **Javascript Assistant, Front End Assistant**

- This app hosts news articles in one place.
- This was our final project. We wanted to showcase everything, but where we really shined was the roadblocks. You can see in our commits that we used one API to make our site until the day before presentation when we realized we had to change everything up and re-factor to include a new API.
- Tools/Languages: HTML, CSS, JavaScript, API's, Bootstrap

Javascript Quiz | **Repo:** <https://github.com/ethandanielsmall/04-javascript-quiz> | **Deployed App:** <https://ethandanielsmall.github.io/04-javascript-quiz/> | **Sole Author**

- This project presents a fun JavaScript related quiz and grades you when the time runs out or when you finish the quiz. Good luck!
- I had only been going to school for about three weeks before making this, so this project is another one that is dear to me. When I began it, I never thought I would be able to make anything close to a quiz, much less a functional one. Then, before I knew it, there it was, a fun and fully functional quiz!
- Tools/Languages: HTML, CSS, JavaScript, Bootstrap
